 An Excel chart embedded in a Word document

An object is an element that you share between documents or applications.

Linking Excel Objects in Word

- Insert an Excel worksheet with object linking
- Word destination document is linked to original Excel source document
- Changes made in source document are reflected in destination document

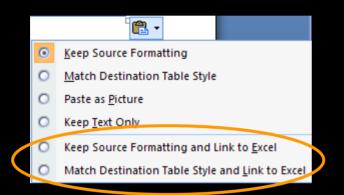

Link via Paste Special

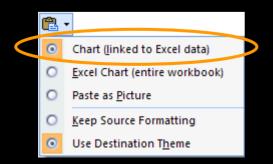

Linking Excel Objects in Word

Link Excel data using the Paste Options smart tag

Link an Excel chart using the Paste Options smart tag

Linking Excel Spreadsheet Data

Changes in source documents are reflected in destination documents
